

# Protect your Crew & Vessel from Flashbacks

W-66S

85-10

Normal flow

## Safety Elements

### 1. Flame arrestor

High quality stainless steel sintered element. A returning flashback is stopped and quenched here.

FA

### 2. Non-return valve

Spring loaded non-return valve against slow and sudden reverse flow.

NV

### 3. Pressure sensitive cut-off valve

Closing automatically with increasing reverse pressure caused by reverse flow or flashback.

PV

### 4. Temperature sensitive cut-off valve

Automatically closing at predetermined internal temperature.

TV

### 5. Pressure relief valve

Spring loaded valve venting flashback shock waves and soot.

RV

Product number 171-183970

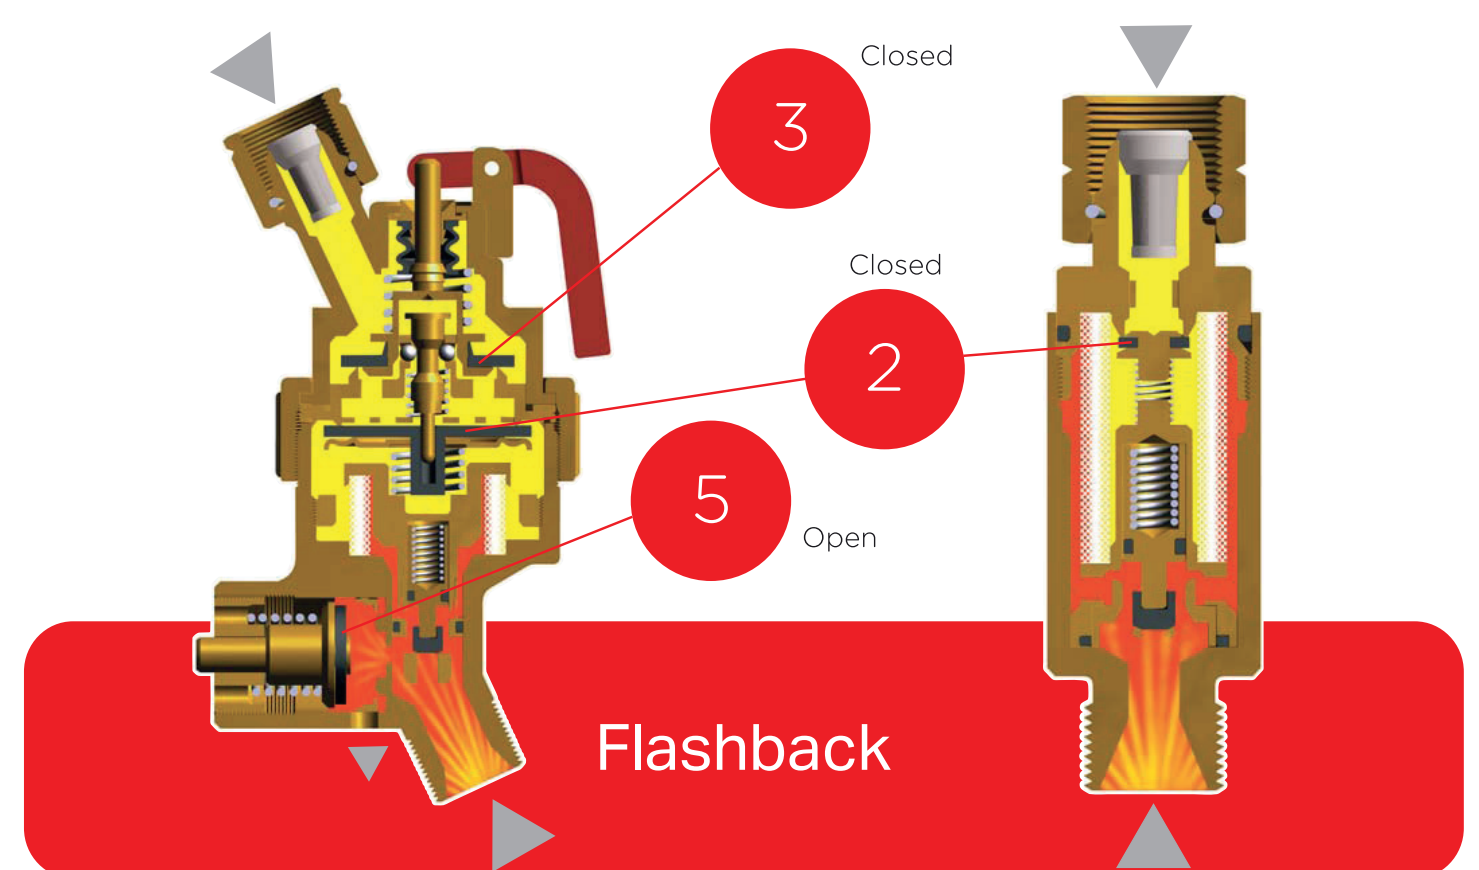

Stop flashbacks from endangering your crew and damaging equipment and cylinders.

Automatic flashback arrestors for gas outlet points:

- Prevent backfeeding

- Cut off gas supply with each flashback

- Cut off gas supply with excessive temperature in the arrestor
