# TOTAL RESIDUAL OXIDANT (TRO) CALIBRATION KIT

Product group: **661** Product number: **779211**

TRO Calibration Solution kit is a calibration solution set specifically designed for use with HF Scientific TRO Analyser and its related products only. Compatible HF TRO Analyser include CLX-EX, CLX-EX2, CLX-XT, CLX-XT2

## Product information

TRO Calibration Solution Kit is an essential calibration package for the operation of chlorination/oxidation type of ballast water management system. TRO sensor which is calibrated, ensure the right amount of chlorine/oxidant is injected for disinfection of ballast water and excess chlorine/oxidant is neutralised for compliance.

### Features

- Designed to be used with HF scientific TRO analyser model CLX-EX, CLX-EX2, CLX-XT, CLX-XT2
- Inclusive: 1 x 500 ml Buffer Reagent, 4x 125 ml Indicator, 4 x 13g DPD powder

### Benefits

- Long shelf life reagent, 5 years

## Specification

### General

<b>Invent Hazard Material (IMQ/ELU) classification</b>	C-9
--	-----

### Physical properties

<b>Appearance</b>	Light yellow
<b>Density [g/ml]</b>	1.1
<b>Form</b>	Liquid
<b>pH</b>	13-14

## Documents

[SDoC and MD for IHM](#)

## Directions for use

Follow manufacturer guideline for calibration of TRO sensor.
