MEG (MONO ETHYLENE GLYCOL)

Product group: **370** Product number: **912021**

MEG (MONO ETHYLENE GLYCOL) keeps your critical systems protected and performing in the harshest conditions, from engine cooling to LNG regas and FPSO/FSRU's operations, reducing downtime, extending equipment life and keeping your fleet earning.

Product information

When temperatures drop, your operations shouldn’t slow down. Freezing, overheating, and costly equipment damage can disrupt performance and compliance—but you can prevent it.

Our winterization solution helps keep your systems running smoothly, no matter the season. By combining coldweather and anti-boiling protection with advanced corrosion control, you reduce downtime, extend equipment life, and maintain efficiency—even in harsh marine environments.

Features

Flexible delivery options to bring the product to you- You can select road transport options via IBC tanks or tank trucks, and our team experienced team can ensure timely delivery to your vessel’s location.

Benefits

Anti - Freeze Protection
Anti- Boil protection
Versatile use

Specification

Physical properties

Appearance	Colourless
Concentration	99.9% and above
Density	1.12
Flash Point [°C]	111
Melting point	-13
Physical state	Liquid
